

Use the following steps to view a specific campus ITV classroom connected to the conference. Please note that the following instructions apply when more than one campus is connected to the conference (i.e. Columbia plus Franklin and Lawrenceburg). If you have all campuses connected to your conference, it is not possible to singly select the "5th site" in the conference. Lewisburg's system is not capable of single site selection.

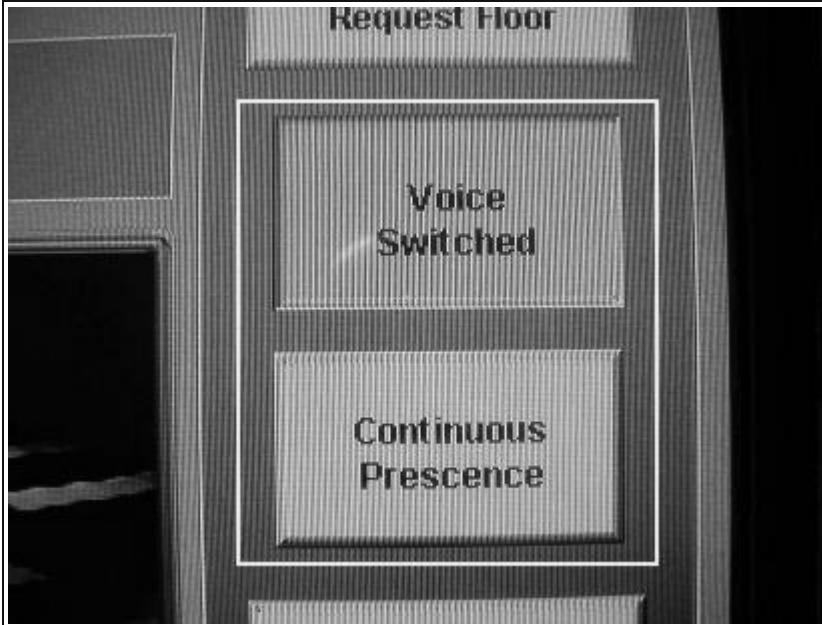

On the right-side of the Tandberg panel, press the Multi-Point Control button.

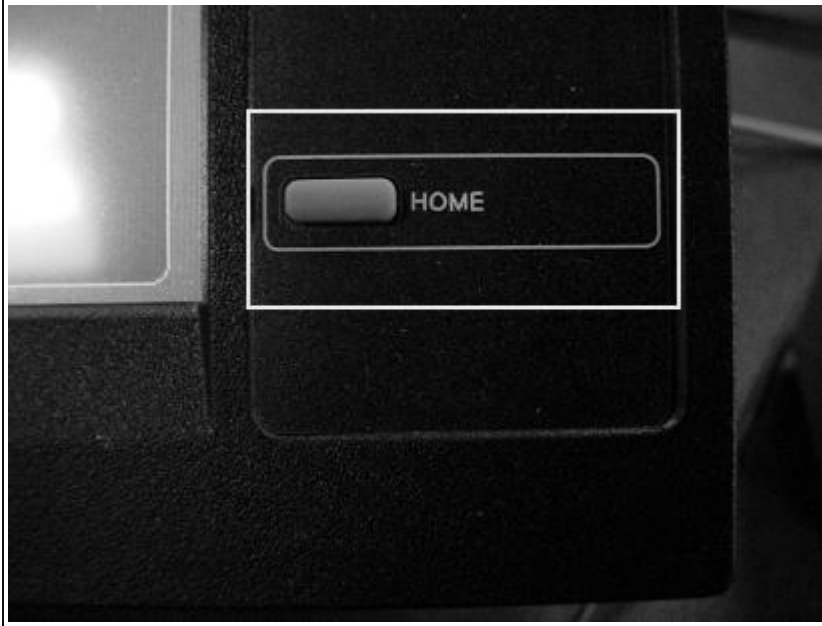

Next, press the MCU (Multi-Point Control) icon of the extended campus site you wish to view.

Note: Because this is an interactive system, it is possible the view will switch to another site. Press the site icon again to reclaim the view of the extended campus you wish to see.

To return to normal operation, first press Continuous Presence and then Voice Switched.

Finally, on the right side of the Tandberg panel, press the Home button.
